A Lewis Center Report on
Clergy Age Trends
in the
United Methodist Church: 1985-2009

2009 Figures as of April 2009

Purpose and Description _____	3
Changes Since Earlier Reports _____	4
Why Young Clergy Matter _____	5
Elders _____	8
Deacons _____	16
Local Pastors _____	22

For the latest figures available from other denominations, see the 2008 edition of the Lewis Center's clergy age trends report available at www.churchleadership.com.

Purpose and Description

The purpose of this research project is to identify clergy age trends in the United Methodist Church since 1985 so that denominational leaders will have the data for planning and a baseline for monitoring future changes. This report builds on the first report on clergy age trends issued by the Lewis Center for Church Leadership in 2006. That report, *Clergy Age Trends in the United Methodist Church: 1985-2005*, documented the dramatic decline in United Methodist young clergy in both numbers and percentages over twenty years. This report presents a snapshot of where clergy age trends stand in April 2009.

These clergy age trends are further analyzed in *The Crisis of Younger Clergy* (Abingdon Press, 2008) by Lovett H. Weems, Jr., and Ann A. Michel. The book considers why the number of young clergy has declined so precipitously in recent decades and what can be done to reverse this trend. Drawing on clergy age data and recent survey results, the book profiles the young clergy population in the United Methodist Church. It exposes the many challenges younger clergy face while lifting up the unique gifts they have to offer. The book is available for purchase at Amazon.com and Cokesbury.com.

Clergy ages are not easy to track because few units of the church have up-to-date age information on clergy. The one exception is the General Board of Pension and Health Benefits (GBOPHB). The Lewis Center for Church Leadership of Wesley Theological Seminary has worked with the Board to determine age trends for United Methodist clergy.

The project covers elders, deacons, and local pastors in the five jurisdictional conferences of the United Methodist Church. Ordained deacons as we have now in the United Methodist Church are relatively new, making trend comparisons over many years difficult. To have comparable figures across the years for elders, the figures include *not only those who have been ordained elder but also those who have been commissioned* on the elder track but not yet ordained. While not all clergy are in the denominational pension system, most are and the percentage not in the system tends to stay the same across the years, thus making trend comparisons possible. Readers should keep in mind that the number of total deacons is significantly lower in this report than their presence in the denomination because more deacons than other clergy work in employment settings with pension plans other than through the GBOPHB. For local pastors, full-time and part-time local pastors are included, but student local pastors are excluded. Since the GBOPHB does not keep records of clergy by race, we were not able to make comparisons by racial groups.

In addition to the cooperation of the GBOPHB, the Lewis Center for Church Leadership conducted this research project through funding from the Lilly Endowment, Inc. through its Sustaining Pastoral Excellence Initiative and from donors to the Lewis Center for Church Leadership.

Lovett H. Weems, Jr., distinguished professor of church leadership and founding director of the Lewis Center for Church Leadership, was project director. Joseph E. Arnold, research manager of the Lewis Center, and Ann A. Michel, associate director of the Lewis Center, were associate directors of the project. Barbara Boigegrain, general secretary of the General Board of Pension and Health Benefits, and the staff of the Board, particularly Anne Borish, Peter Doheny, and Otissteven Arrington provided essential cooperation and data. Thanks go also to the General Council on Finance and Administration for sharing data they collect and to the General Board of Higher Education and Ministry for their collaboration around enlistment and overall young clergy issues.

Changes Since Earlier Reports

Again this year, there is modest good news for United Methodists. The consistent decline in under-35 elders as a percentage of all elders hit its low point in 2005 and has held relatively steady with slight increases since then. In 2008 under-35 elders reached 5 percent of active elders for the first time this century. In 2009 the numbers are virtually unchanged both in numbers and percentage.

Young Elders

- The percentage of young elders continued to increase ever so slightly again in 2009, marking a consistent trend since the low point was reached in 2005 when under-35 elders made up only 4.69 percent of all active elders. The percentage in 2009 is 5.25, up from 5.21 percent in 2008.
- While the actual number of young elders remains well above the low point of 850 in 2005, there was a slight drop in the number of under-35 elders in 2009 to 906 from 910 in 2008.
- The number of young elders may be the number to watch more carefully than the percentage number in the years ahead since the same or fewer young elders should continue to represent a larger percentage of active elders simply because the total pool of active elders is declining significantly each year with retirements exceeding new entrants.

Young Deacons

- The growth in the number and percentage of young deacons in recent years has been significant. Young deacons now comprise 8.42 percent of deacons, well ahead of elders percentage wise, though their total numbers remain relatively small compared to elders.

Young Local Pastors

- Young local pastors showed a significant increase in percentage and numbers between 2008 and 2009, reaching their largest number and percentage in recent history. Now young local pastors are the same percentage as elders, though fewer in numbers.

Older Clergy

- On the other end of the age spectrum of active clergy, the greatest growth continues to occur in the 55 to 72 age cohort.
- This group among elders increased from 46 percent in 2008 to 48 percent in 2009.
- Twenty-seven conferences have 50 percent or more of their active elders in this category.
- Deacons in this older age group increased slightly from 2008 to 2009, from 43 percent to 44 percent.
- Local pastors, traditionally an older group, continue to have a larger percentage between 55 and 72, going from 50 percent in 2008 to 52 percent in 2009.

Middle Age Clergy

- The middle-age grouping, 35 to 54, declined in recent years.
- Elders in this age group went from 49 percent in 2008 to 47 in 2009.
- Deacons of this age declined slightly from 49 percent in 2008 to 48 in 2009.
- Middle-age local pastors declined as a proportion of all local pastors from 44 percent to 42 percent between 2008 and 2009.

Median, Average, and Mode Ages in 2009

- Median - (half older, half younger): elders, 54; deacons, 53; local pastors, 55.
- Average – elders, 54; deacons, 51; local pastors, 53.
- Mode - (single age most represented): elders, 57; deacons, 53; local pastors, 60.

What about the Baby Boomers?

Through 2006 the single age represented by the largest number of elders tracked consistently with the aging of the first cohort of Baby Boomers born in 1946. But since 2007 the first of the Baby Boomers have been outnumbered by groups of elders born somewhat later. Since the first Baby Boomer group had been the largest for so many years, the question arose whether the first Baby Boomers were retiring in great numbers than might be expected before the age of 64, the most common age in recent years for retirement. (The first of the Baby Boomers will reach 64 in 2010.) If Boomers are retiring earlier than expected, then conference projections for retirements would need to take account of such a trend.

The General Board of Pension and Health Benefits provided the following data about the entire Baby Boomer generational cohort. They seem to suggest that while there are some retirements, they tend to be relatively few in number through 2009.

Total Baby Boomer elders in the GBOPHB system in 2009	3,986
Total Baby Boomer elders active in 2009	3,630 (91.1 percent)
Total Baby Boomer retirees in 2009	54 (1.4 percent)
Total Baby Boomers on leave, disability, etc.	302 (7.5 percent)
Total Baby Boomer elders in full connection in 2009	3,053 (76.6 percent)
Total Baby Boomer provisional elders in 2009	933 (23.4 percent)

Note: Baby Boomers are those born in the years 1946 – 1964.

Why Young Clergy Matter **By Lovett H. Weems, Jr., and Ann A. Michel**

Younger clergy aren't necessarily better. They're just younger.

And that matters.

Lovett H. Weems, Jr.

In recent decades, many North American churches have suffered a serious and sustained decline in the number and percentages of clergy under the age of 35. In many denominations, the percentage of younger clergy has slipped close to 5 percent or even less. While middle-aged and older pastors bring vital gifts to the practice of ministry, it is troubling that the church allows so many younger persons to ignore God's call.

There are a number of important reasons why the pool of clergy must include a proportionate number of younger persons. The declining number of young clergy deprives the profession at both ends of the age spectrum. The new ideas, creativity, energy, and cultural awareness often exhibited by the young are lost. And with more persons entering ministry with fewer years to serve, the wisdom and experience that can come with long tenures in ministry are also in jeopardy.

Church leaders who gathered recently to discuss clergy age trends were asked the question "Why are young clergy important?" They responded with comments such as, "Younger clergy have an ability to see the world and the church through new eyes," "They bring enthusiasm, idealism, and fresh perspectives to the practice of ministry," and "Young clergy are more open to innovation and more nimble in working with new ideas."

In many instances, young clergy bring tremendous energy to the demands of ministry because of the mental and physical stamina associated with youth. The schedules and routines of the young may be more flexible, and they are available for and interested in innovative challenges holding significant risk.

Young clergy also have certain advantages in reaching out to their own generation. They are more likely to speak the language of an emerging generation whose world view and communication modes differ from those of their parents' generation. They show high sensitivity to diversity and other cultural realities in today's world. Just as important, the mere presence of young clergy in a church symbolizes that younger persons are valued as leaders and participants.

These factors help explain why young clergy seem particularly well-suited to the task of church planting. Research conducted in the Episcopal Church has found that pastors between the ages of 24 and 35 were the most successful in founding churches that reach 250 or more in worship attendance within seven years. An informal poll of congregational development officials in the United Methodist church also showed a preference for church planters aged 25 to 35.

Research on the differences between younger and older seminary students sheds light on some other attributes of younger clergy. While older students tend to bring important experience in

congregational life, younger students tend to enter seminary with better academic records in college or previous graduate studies, and they are more likely to have educational training in disciplines such as theology, religion, philosophy, and other humanities traditionally regarded as appropriate preparation for theological study. And preliminary data from Lewis Center research on pastoral effectiveness indicate that laity tend to rate young clergy as highly effective, even though they may not be as self confident as their older peers.

But just as youthfulness has advantages in ministry, so does experience. Leadership is a form of expertise that has a long gestation period. In most fields, attaining the status of expert requires at least ten years of extensive experience and training. Without sufficient numbers of younger persons entering the profession, there will be fewer clergy in the pipeline who have achieved the longevity of service required for the most challenging pastoral assignments and denominational leadership roles. While the growing number of middle-aged and older persons who enter ministry bring many important gifts, it is also true that many will not achieve the longevity of service needed for some of the most demanding ministry roles such as serving as lead pastor of a very large congregation.

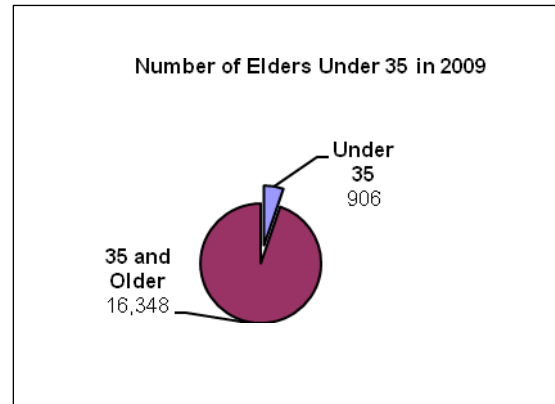

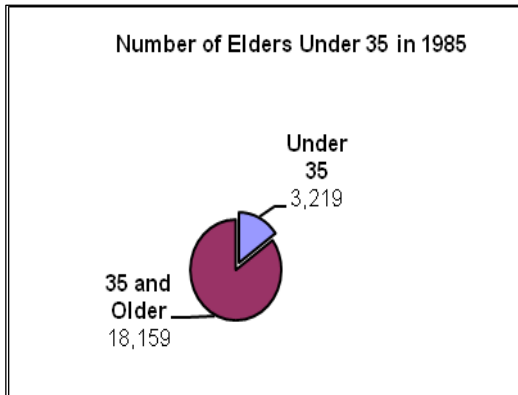

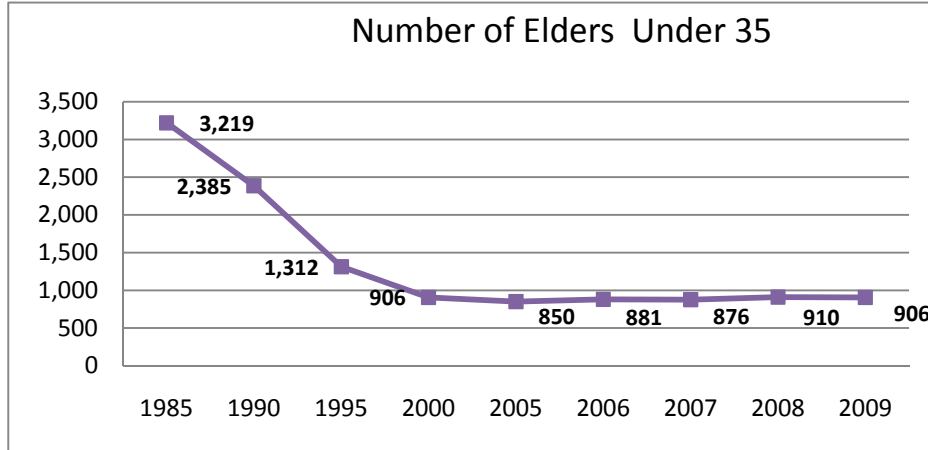

The dearth of young clergy is contributing to an impending leadership crisis in yet another way. The growing percentage of elders who are 55 and older raises the specter of a tidal wave of retirements hitting the system in the not-too-distant future. The aging of the church's clergy pool poses other practical and institutional challenges such as pension and health care challenges.

Having a proportionate number of young persons entering ordained ministry is vital to the vibrancy of the church, as well as its ability to attract younger congregants and form new congregations. And it is essential for developing the long-term experience in ministry necessary for the most challenging assignments. Young clergy do, indeed, matter.

Lovett H. Weems, Jr., and Ann A. Michel are the authors of *The Crisis of Younger Clergy*, copyright 2008, Abingdon Press. This material is adapted from chapter three of that book and used by permission.

Elders

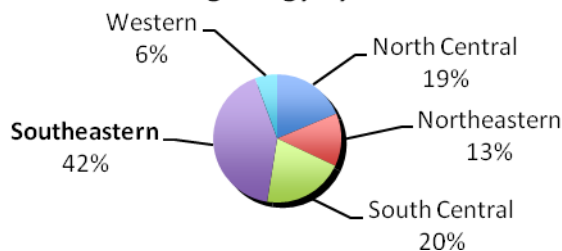

To have comparable figures across the years for elders, the figures include *not only those who have been ordained elder but also those who have been commissioned on the elder track but not yet ordained*. Since the General Board of Pension and Health Benefits does not keep records of clergy by race, we were not able to make comparisons by racial groups.

Ordained deacons as we have now in the United Methodist Church are relatively new, making trend comparisons over many years difficult, but we do report current age data. We include *not only those who have been ordained deacon but also those who have been commissioned on the deacon track but not yet ordained*. Readers should keep in mind that the number of total deacons is significantly lower in this report than their presence in the denomination because more deacons than other clergy work in employment settings with pension plans other than through the General Board.

**Median, Average, and Mode Ages - Deacons
by Year**

Year	Median* Age	Average Age	Mode* Age
2006	53	51.67	50
2007	52	51.40	51
2008	53	51.34	-
2009	53	51.42	53

*Median - half older, half younger *Mode - single age most represented
 *Some groups have no mode value because no unique mode exists--
 no age occurred more frequently than another.

Gender Breakdown within Age Cohorts – Deacons

	Men	Under 35	35 - 54	55 - 72
2007		37%	32%	19%
2008		36%	34%	21%
2009		35%	33%	29%
	Women	Under 35	35 - 54	55 - 72
2007		63%	68%	81%
2008		64%	66%	79%
2009		65%	67%	71%

Local Pastors

For local pastors, full-time and part-time local pastors are included, but student local pastors are excluded.

Number of Local Pastors Under 35

Percentage of United Methodist Local Pastors Under 35

Data on Age Trends for Local Pastors 1985 - 2009

Year	No. of Local Pastors	Local Pastors Under 35	% Under 35	Local Pastors 35-54	% 35-54	Local Pastors 55-70	% 55-70
1985	3,804	130	3.4%	2,212	58.1%	1,462	38.4%
1990	3,936	163	4.1%	2,244	57.0%	1,529	38.8%
1995	4,622	290	6.3%	2,641	57.1%	1,691	36.6%
2000	5,571	348	6.2%	3,109	55.8%	2,114	37.9%
2005	6,517	371	5.7%	3,213	49.3%	2,933	45.0%
2006	6,731	363	5.4%	3,201	47.6%	3,167	47.1%
2007	6,863	376	5.5%	3,166	46.1%	3,321	48.4%
2008	6,981	367	5.3%	3,094	44.3%	3,520	50.4%
2009	7,164	397	5.5%	3,039	42.4%	3,728	52.0%

**Median, Average, and Mode Ages – Local Pastors
by Year**

	Median Age*	Average Age	Mode Age*
1985	51	49.6	59
1990	51	50.4	60
1995	51	50.3	48
2000	52	50.8	53
2005	53	52.2	58
2006	54	52.5	59
2007	54	52.8	60
2008	55	53.3	59
2009	55	53.5	60

* Median – half older, half younger
* Mode – single age most represented

Gender Breakdown within Age Cohorts - Local Pastors

	Men	Under 35	35 - 54	55 - 72
2007		76%	71%	69%
2008		75%	70%	68%
2009		77%	70%	68%
	Women	Under 35	35 - 54	55 - 72
2007		24%	29%	31%
2008		25%	30%	32%
2009		23%	30%	32%

About the Lewis Center for Church Leadership

Established by Wesley Theological Seminary in 2003, the Lewis Center for Church Leadership has developed a solid track record in helping the United Methodist Church address its current challenges. The Center is building a vision for church leadership grounded in faith, informed by knowledge, and exercised in effective action. It seeks a holistic understanding of Christian leadership that brings together theology and management, scholarship and practice, research and application.

Committed to the broad goal of helping the church reach more people, younger people, and more diverse people, the Center focuses on improving leadership effectiveness and providing actionable insights and best practices to promote effective ministry. The Center seeks to be a trusted resource for church leadership helping congregations and denominations serve, thrive, and grow. The Center staff of six, along with other researchers and consultants who assist with special projects, also draws on the expertise of the entire Wesley faculty and a wide array of gifted practitioners.

Leading Ideas Online Newsletter

Leading Ideas is a free bi-weekly online newsletter of the Lewis Center for Church Leadership. Thousands of clergy and lay leaders from across the U.S. and around the world make use of this important leadership resource.
