## Highlights of the 2016 Report

## Decade-Long Modest but Steady Increase in Young Elders Continues

In 2005, the United Methodist Church reported the smallest percentage of under-35 elders ever. The 850 young elders that year represented 4.69 percent of active elders. Growth among young elders has been slow but relatively steady, about 14 per year, since 2005. In 2016, there are 1,003 young elders that comprise 6.84 percent of the pool of active elders, the highest since the 1990s. The overall pool of active elders is now smaller by almost 3,500 elders since 2005.

Gender has been a major factor in the gains. Through 2015, all the increases in young elders since the low point in 2005 came from women. There were gains in young male elders in 2016 so that the figures now show gains for both men and women.

Young Male Elders in 2005 - 587
Young Male Elders in 2016 - 602
Change 12

Young Female Elders in 2005 - 263
Young Female Elders in 2016 - 401
Change 138

## Fewer Middle Age Elders

Unfortunately, the modest gain in the presence of young elders was offset by a continuing substantive decline in the number and percentage of elders aged 35 to 54 . This mid-age group continues to shrink, from 65 percent of all active elders in 2000 to 37 percent in 2016.

This has major implications for bishops and superintendents who traditionally looked to elders in this broad age spectrum to fill appointments that required some years of experience. Today, when cabinets look to this pool for appointments, there are over 6,500 fewer such clergy than in 2000.

## Proportion of Older Clergy Continues to Grow

Elders between ages 55 and 72 comprise 56 percent of all active elders, the highest percentage in history. This group reached 50 percent for the first time ever in 2010. This age cohort represented only 30 percent of active elders as recently as 2000. The median age of elders remained at 56 in 2016, the highest in history. The average age remains at 53, a historic high, though unchanged for seven years. The mode age (the single age most represented) is 61 , up from 60 last year.

## Fewer Elders and Local Pastors

Elders and local pastors are appointed as pastors of congregations. Since at least the 1980s there has been a major decline in the number of active elders while the number of local pastors increased dramatically. In 2016 there is a decline in both active elders and local pastors, though the elder decline is greater. The result is that since 1990 there are 6,842 fewer elders and 3,472 more local pastors. In 1990, there were over five elders for each local pastor; today there are two elders for each local pastor. In 2016, there are 14,665 elders and 7,408 local pastors.

## Retirement Ages Increasing

A new feature of this year's report shows retirement age trends for United Methodist clergy in the U.S. Since 2000 there has been a fairly consistent increase in the age at which clergy retire. The average does not increase every year, but the trend is markedly upward. The average age at which United Methodist clergy retired in 2000 was just under 64. By 2015, the last full year of data, the average retirement age had increased to just over 66. The retirement ages for different types of clergy are similar but not the same. For example, in 2015 the retirement ages were: elders - 66, deacons - 67, full time local pastors - 68, and part time local pastors - 69 .

The purpose of this ongoing research effort is to identify clergy age trends in the United Methodist Church so that denominational leaders have the data for planning and a baseline for monitoring future changes. This report builds on previous reports on clergy age trends issued by the Lewis Center for Church Leadership. The first report, Clergy Age Trends in the United Methodist Church: 1985-2005, documented the dramatic decline in United Methodist young clergy in both numbers and percentages over 20 years. This report presents a snapshot of where clergy age trends stand in May 2016.

This report is made possible through partnership with the denominational pension agency, Wespath Benefits and Investments (WB), formerly known as the General Board of Pension and Health Benefits. The Lewis Center works with WB each year to determine age trends for United Methodist clergy.

The project covers elders, deacons, and local pastors in the five jurisdictional conferences of the United Methodist Church in the United States. While not all clergy are in the denominational pension system, most are, and the percentage not in the system tends to stay the same across the years, thus making trend comparisons possible. Readers should keep in mind that the total number of deacons is significantly lower in this report than their presence in the denomination because more deacons than other clergy work in employment settings with pension plans other than through WB. For local pastors, both full-time and parttime local pastors are included. Since WB does not keep records of clergy by race, we are not able to make comparisons by racial groups.

To help the church address the dramatic loss of young clergy first reported in 2005, the Lewis Center for Church Leadership has provided resources beginning with The Crisis of Younger Clergy by Lovett H. Weems, Jr., and Ann A. Michel (Abingdon, 2008) and the formation of the Lewis Fellows program to provide advanced leader development for approximately 20 young clergy each year.

More recently, the Lewis Center developed a series of free one-page downloadable documents to assist those seeking to support younger clergy.

## Contributors

Lovett H. Weems, Jr., professor of church leadership and founding director of the Lewis Center for Church Leadership, and Joseph E. Arnold, research manager of the Lewis Center, were project directors. Ann A. Michel, associate director of the Lewis Center, and Matthew Lyons, marketing manager of the Lewis Center, contributed to the project. Barbara Boigegrain, general secretary of Wespath Benefits, and the staff, particularly Anne Borish, Peter Doheny, Helen Exarhakos, Tanya Lerner, and Otisstean Arrington, provided essential cooperation and data. Thanks go also to the General Council on Finance and Administration for sharing data they collect.

## Young Clergy Trends

## Young Elders

- The number of under-35 elders increased from 986 in 2015 to 1,003 in 2016.
- The percentage of young elders grew from 6.57 percent in 2015 to 6.84 percent in 2016.
- The Texas Conference again reported the highest percentage of young elders at 12.61 percent. This is the first time that an annual conference has been number one in three consecutive years.
- The Top Ten Conferences by percentage
- Texas (also \#1 in 2015, 2014, and 2012)
- Mississippi (\#1 in 2010 and 2006)
- North Alabama
- Dakotas
- Virginia
- North Carolina
- South Carolina (new since last report)
- Tennessee
- Arkansas (new since last report; \#1 in 2008 and 2007)
- Western North Carolina (new since last report)
- Trending Conferences (those with strong increases over the past three years; in alphabetical order)
- California-Nevada
- Florida
- North Texas
- As in previous years, most of the conferences with larger percentages of young clergy are from the Southeastern and South Central Jurisdictions. Dakotas from the North Central Jurisdiction appears in the Top Ten again this year. Since these reports began in 2005, the North Central and Western Jurisdictions have had two conferences each in the Top Ten, and the Northeastern Jurisdiction has had one conference in the Top Ten lists.
- The largest total number of young elders (60) is in the Virginia Conference, followed by Western North Carolina (58) and Texas (57).

## Young Deacons

- The number of under-35 deacons increased significantly from 90 in 2015 to 113 in 2016. This is a record high number of young deacons.
- The percentage of young deacons increased from 9.43 percent in 2015 to 11.27 percent in 2016, also a record high.
- While the number of young deacons is still small compared to young elders, the percentage of all deacons has run consistently higher than that of young elders since 2008.

## Young Local Pastors

- The number of under-35 local pastors declined by four from 601 in 2015 to 597 in 2016.
- The percentage of young local pastors stayed the same at 8.05 percent in 2016.

## Elders

To have comparable figures across the years for elders, the figures include not only those ordained elder but also those commissioned on the elder track but not yet ordained.

## Mean, Median, and Mode Ages by Conference

Median — half older, half younger. Mode — single age most represented.
Some have no mode value because no unique mode exists (no single age occurred more frequently than another).

## Deacons

Deacon numbers include not only those who have been ordained deacon but also those who have been commissioned on the deacon track but not yet ordained. Readers should keep in mind that the total number of deacons is significantly lower in this report than their presence in the denomination because more deacons than other clergy work in employment settings with pension plans other than through the WB.

## About the Lewis Center for Church Leadership

Established by Wesley Theological Seminary in 2003, the Lewis Center for Church Leadership has worked to help the United Methodist Church address its current challenges. The Center is building a vision for church leadership grounded in faith, informed by knowledge, and exercised in effective action. It seeks a holistic understanding of Christian leadership that brings together theology and management, scholarship and practice, research and application.

Committed to the broad goal of helping the church reach more people, younger people, and more diverse people, the Center focuses on improving leadership effectiveness and providing actionable insights and best practices to promote effective ministry. The Center seeks to be a trusted resource for church leaders so that congregations increase in service, vitality, and growth. The Center staff of five, along with other researchers and consultants who assist with special projects, also draws on the expertise of the entire Wesley Seminary faculty and a wide array of gifted practitioners.
